

Sourcing Food **Locally** Criteria

H  **NOR**
Healthier Options NORfolk Award

'Local' food is food that has been produced, processed and traded within East Anglia or up to 30 miles from the food business.

This is important because food transport has been increasing steadily over the last few decades. This has a direct impact on the environment, contributing to congestion, greenhouse gas emissions, noise and air pollution.

In addition, trading locally delivers health, economic and social benefits to your local community.

The Sourcing Food Locally criteria are optional and are not necessary to achieve the HONOR.

- 1.** Does your establishment serve five or more products that have been sourced locally eg potatoes, eggs, carrots and meat?

Yes No

- 2.** Please list the local produce that you sell, where it is from, and the provider's contact details:

- 3.** Is evidence provided that the food is locally sourced (eg copies of invoices, letter from wholesaler)?

Yes No
